

## VPI IMMINGHAM ENVIRONMENTAL POLICY

### Principle

Vitol Power International Immingham (VPII) is committed to excellence in environmental operation and performance, ensuring that systems are in place and resources are available to meet this commitment. We shall operate and maintain VPII in a manner using good practice that protects the environment by prevention of pollution.

This Policy will apply to all Employees, Contractors and Visitors.

### Policy

- Good environmental performance is important to everyone who works within our business. We are committed to achieving the best possible environmental performance allied with efficient use of natural resources.
- VPII will comply with all applicable environmental regulations and seek effective working relationships with appropriate agencies.
- Implement management systems for environmental performance and seek external accreditation to demonstrate compliance.
- Action plans and measurable environmental targets will be included in our business plans and supported by personal objectives as a commitment to continual improvement within environmental management.
- Seek input from, and work constructively with everybody who works with us, including Stakeholders and Regulators, by discussing matters in a transparent way and maintain relationships at all levels to ensure we meet our compliance obligations.

### Practice

We regard compliance with applicable legislation as a minimum level of achievement and we will comply with other requirements that relate to our environmental aspects. Furthermore, we are committed to managing, monitoring and reducing, where practicable, the environmental impacts caused by our business through continual improvement of our operations, in particular emissions to air and water, disposal of waste and the use of natural resources. We will refer to relevant best industrial practices to help us in our drive for continual improvement in environmental performance.

David Brignall

VPII Manager
